

SWAG LABS – MANUAL QA BUG REPORT

Application: Swag Labs

Website: <https://www.saucedemo.com>

Testing Type: Manual / Exploratory Testing

Test User: problem_user

Password: secret_sauce

Tester: Bandaboina Ketha

Date: 8/10/2026

BUG-001 – Incorrect Product Opens

Module: Product Details

Severity: High

Priority: High

Status: Open

Description

When a user selects certain products from the Products page, a different product is displayed on the product details page.

Preconditions

- User is logged in as problem_user.
- User is on the Products page.

Steps to Reproduce

1. Log in using problem_user.
2. Open the Products page.
3. Click **Sauce Labs Backpack**.
4. Observe the product details.
5. Go back to the Products page.
6. Click **Sauce Labs Bike Light**.
7. Observe the product details.

Expected Result

The product details page should display the same product that the user selected.

Actual Result

- Selecting **Sauce Labs Backpack** opens **Sauce Labs Fleece Jacket**.
- Selecting **Sauce Labs Bike Light** opens **Sauce Labs Bolt T-Shirt**.
- Some product images on the Products page also do not match the corresponding products.

Impact

Users may see incorrect product information and could select or purchase a different product from the one they intended to view.

BUG-002 – Add to Cart Does Not Work from Product Details

Module: Product Details / Shopping Cart

Severity: High

Priority: High

Status: Open

Description

The **Add to Cart** button does not add the selected product to the cart when it is used from the product details page.

Preconditions

- User is logged in as problem_user.

Steps to Reproduce

1. Log in using problem_user.
2. Select a product.
3. Open its product details page.
4. Click **Add to Cart**.
5. Open the shopping cart.
6. Check whether the selected product is present.

Expected Result

The selected product should be added to the cart and the cart count should increase.

Actual Result

The selected product is not added to the cart after clicking **Add to Cart** from the product details page.

Impact

Users may be unable to add a product to the cart when viewing its details, which can prevent them from completing a purchase.

BUG-003 – Remove Button Does Not Remove Product

Module: Shopping Cart

Severity: High

Priority: High

Status: Open

Description

The **Remove** button does not remove a product from the shopping cart.

Preconditions

- User is logged in as problem_user.
- A product has already been added to the cart.

Steps to Reproduce

1. Log in using problem_user.
2. Add a product from the Products page.
3. Verify that the button changes to **Remove**.
4. Open the shopping cart and verify that the product is present.
5. Return to the Products page.
6. Click **Remove** for the same product.
7. Open the shopping cart again.

Expected Result

The selected product should be removed from the shopping cart.

Actual Result

The product remains in the shopping cart after clicking **Remove**.

Impact

Users cannot reliably manage their cart contents. An unwanted product may remain in the cart before checkout.

BUG-004 – Some Products Cannot Be Added to Cart

Module: Products / Shopping Cart

Severity: High

Priority: High

Status: Open

Description

The **Add to Cart** function does not work for certain products when they are added directly from the Products page.

Affected Products

- **Test.allTheThings() T-Shirt (Red)**
- **Sauce Labs Bolt T-Shirt**
- **Sauce Labs Fleece Jacket**

Preconditions

- User is logged in as problem_user.
- User is on the Products page.

Steps to Reproduce

1. Log in using problem_user.
2. Open the Products page.
3. Locate one of the affected products.

4. Click **Add to Cart**.
5. Observe the button and cart count.
6. Open the shopping cart and check whether the product is present.

Expected Result

The selected product should be added to the cart.

The cart count should increase and the button should change from **Add to Cart** to **Remove**.

Actual Result

For the affected products:

- The product is not added to the cart.
- The cart count does not increase.
- The button remains **Add to Cart**.

Impact

Users may be unable to purchase certain products that are displayed as available on the website.

BUG-005 – Checkout Focus Moves to First Name

Module: Checkout

Severity: High

Priority: High

Status: Open

Description

While entering the Last Name during checkout, the input focus unexpectedly moves back to the First Name field.

Preconditions

- User is logged in as problem_user.
- A product has been added to the cart.
- User has reached the Checkout Information page.

Steps to Reproduce

1. Log in using problem_user.
2. Add a product to the cart.
3. Open the cart and proceed to checkout.
4. Enter a First Name.
5. Click the **Last Name** field.
6. Start entering the Last Name.
7. Observe the cursor and the input fields.

Expected Result

The Last Name field should remain focused and accept the complete Last Name.

Actual Result

While entering the Last Name:

- Focus unexpectedly moves back to the **First Name** field.
- The Last Name field remains incomplete or empty.
- Further typing can enter a character in the First Name field.

Impact

The unexpected focus change can make it difficult for the user to enter the required checkout information and may prevent the checkout process from being completed.

Bug Summary

Bug ID	Module	Description	Severity	Priority
BUG-001	Product Details	Wrong product opens after selection	High	High
BUG-002	Product Details / Cart	Add to Cart fails from product details	High	High
BUG-003	Shopping Cart	Remove does not remove product	High	High
BUG-004	Products / Cart	Some products cannot be added	High	High
BUG-005	Checkout	Focus unexpectedly moves to First Name	High	High

Overall Testing Observation

The five issues were identified during manual exploratory testing using the problem_user account.

The defects were found across different parts of the application:

- Product selection and product details
- Adding products to the cart
- Removing products from the cart
- Product-specific cart behaviour
- Checkout form behaviour

The issues can affect the user's ability to select products correctly, manage the cart, and complete an order.
